EAGLESCROFT

CONTENT CALENDAR

EAGLESCROFT: content week · Thu 12 – Wed 18 Nov 2026

LinkedIn · Facebook · X — Abuja to the world

Seven posts across LinkedIn (company page), Facebook and X, one per day. All are in the new **Blue Glass** look with the EAGLESCROFT wordmark (`design/templates/glass.css`). Lanes rotate through what we actually do: CRM, websites, AI in practice, how we work, automation, product updates and digital marketing.

Status key: READY graphic ready · BUILD I build it · NEEDS YOU needs something from you

Posting times (WAT):
- **LinkedIn:** 08:30
- **Facebook:** 12:30
- **X:** 08:00, plus the thread or a short cut at 18:30

Links go in the first comment or reply, never in the post body. Reply to every comment within the first hour.

Day	Series	Lane	Post	Format	Status
Thu 12	Flight Report	CRM + outreach	13,000 raw records. 12,000+ scored leads.	6-slide carousel	READY
Fri 13	Ground School	Websites	Is your website losing customers? The 7-point check	6-slide carousel	READY
Sat 14	Cockpit Chat	AI in practice	Brief AI like a new hire	Single image	READY
Sun 15	Hangar Notes	How we work	How a project flies with EAGLESCROFT	Single image	READY
Mon 16	Ground School	AI automation	4 reasons businesses haven't automated yet, and our honest answers	6-slide carousel	READY
Tue 17	On the Radar	Product updates	AI can now answer your customers on WhatsApp and Google. Should you switch it on?	4-slide carousel	READY
Wed 18	Ground School	Digital marketing	Before you boost that post: 5 checks so your ad money isn't wasted	6-slide carousel	READY

Thu 12: Flight Report: "13,000 raw records. 12,000+ scored leads."

Graphic: `posts/2026-11/012-w46-thu-lead-engine/` READY 6 slides: cover → problem → clean → score → write (a human approves) → lesson + CTA.

LinkedIn / Facebook

> 13,000 raw records. 12,000+ scored leads.
>
> A client came to us with a huge prospect list and one problem: nobody could tell who to call first, and every message sounded the same.
>
> So we built a lead engine:
> 1. Clean: removed duplicates, fixed broken fields, filled the gaps
> 2. Score: ranked every lead on how well they fit and how ready they look
> 3. Write: an AI audit engine drafted a tailored opening line for each prospect
>
> The team now starts every day with a ranked list and a personal hook for each call. A human still approves every message. That part stays human.
>
> The lesson: your old list is probably worth more than you think. It just needs a system.
>
> Want us to look at yours? Link in the first comment.
> #LeadGeneration #AIAutomation #CRM #Eaglescroft

X thread (6 posts): 13,000 raw records → 12,000+ scored leads. Here's how 🧵 → the problem → clean → score → write (human approves) → "Your list is worth more than you think. Want us to look at yours?" + link in reply.

Fri 13: Ground School: "Is your website losing customers? The 7-point check"

Graphic: `posts/2026-11/013-w46-fri-website-check/` READY 6 slides: cover → speed + mobile → clear headline + one action → WhatsApp/call + Google profile → trust signals → CTA.

LinkedIn / Facebook

> Your website might be losing customers quietly. Run this 7-point check today:
>
> 1. Speed: does it load in about 3 seconds on mobile data?
> 2. Mobile: can you read and tap everything without zooming?
> 3. Headline: does a visitor know what you do in 5 seconds?
> 4. One action: is there one obvious next step (call, WhatsApp, book, buy)?
> 5. Contact: is WhatsApp or click-to-call one tap away?
> 6. Google: is your Business Profile complete, with hours, photos and the website link?
> 7. Trust: padlock (HTTPS), real photos and reviews?
>
> Fewer than 6 ticks? That's where your leads are leaking. Save this, or book a free call and we'll go through it with you. Link in the first comment.
> #WebDesign #SmallBusiness #DigitalMarketing #Eaglescroft

X thread (4 posts): "Is your website losing customers? Run this 7-point check 👇" → checks 1–3 → checks 4–7 → "Fewer than 6 ticks? That's where leads leak. Book a free call: link in reply."

Sat 14: Cockpit Chat: "Brief AI like a new hire"

Graphic: `posts/2026-11/014-w46-sat-brief-ai/` READY single image: the R-C-T-F-R brief (Role, Context, Task, Format, Rules) with a worked example.

LinkedIn / Facebook

> Bad AI output usually comes from a bad brief.
>
> At EAGLESCROFT we brief AI the way we'd brief a new team member:
> → Role: who should it act as?
> → Context: what does it need to know about the business and audience?
> → Task: what exactly should it produce?
> → Format: length, structure, tone
> → Rules: what must it never do?
>
> Five lines in, a much better first draft out. Then a human edits it. Every time. Save this for your next prompt.
> #PracticalAI #PromptEngineering #AIForBusiness #Eaglescroft

X

> Bad AI output = bad brief. Brief it like a new hire: Role · Context · Task · Format · Rules. Five lines in, a far better first draft out.

Sun 15: Hangar Notes: "How a project flies with EAGLESCROFT"

Graphic: `posts/2026-11/015-w46-sun-how-we-work/` READY single image: a six-stage flight path (Discover → Design → Build → Automate → Launch → Support).

LinkedIn / Facebook

> Every project at EAGLESCROFT follows the same flight plan:
>
> 1. Discover: we learn your business, customers and goals
> 2. Design: brand, pages and journeys, approved by you before we build
> 3. Build: websites, apps, CRMs and content
> 4. Automate: AI and workflows take the repetitive work off your team
> 5. Launch: tested, tracked and handed over properly
> 6. Support: we stay on as your team after take-off
>
> From Abuja to clients around the world. We Help Businesses Fly Online. Planning something for 2027? Let's talk. Link in the first comment.
> #Eaglescroft #DigitalAgency #WebDevelopment #AIAutomation

X

> How every EAGLESCROFT project flies:
> Discover → Design → Build → Automate → Launch → Support. Abuja to the world.

Mon 16: Ground School: "4 reasons businesses haven't automated yet"

Graphic: `posts/2026-11/016-w46-mon-automation-objections/` READY 6 slides: cover → "I don't know where to start" → "It sounds expensive" → "My customers want a human" → "I don't trust AI with my data" → CTA.

LinkedIn / Facebook

> These are the 4 reasons we hear most for not automating yet, and our honest answers:
>
> 1. "I don't know where to start." Start with the question you answer 20 times a day. One workflow, not a whole system.
> 2. "It sounds expensive." Start small with tools you already pay for. Prove the time saved before you spend more.
> 3. "My customers want a human." Good. Automate the waiting, not the relationship: instant replies, then a person takes over.
> 4. "I don't trust AI with my data." Fair. Ask who sees it, where it's stored, and whether it trains the model. Never paste customer data into public tools.
>
> Which one is yours? Tell us below.
> #AIAutomation #SmallBusiness #WorkflowAutomation #Eaglescroft

X thread (6 posts): "4 reasons businesses haven't automated yet, and honest answers 🧵" → one post per reason → "Which one is yours?"

Tue 17: On the Radar: "AI can now answer your customers on WhatsApp and Google"

Graphic: `posts/2026-11/017-w46-tue-ai-agents-radar/` READY 4 slides: cover → Meta Business Agent on WhatsApp → Google Business Profile AI messaging → our take: 5 checks before you switch it on.

LinkedIn / Facebook

> Two big platforms now want AI to answer your customers for you.
>
> → WhatsApp: Meta's Business Agent can answer questions, recommend products and book appointments, then hand over to your team.
> → Google: AI messaging on Business Profiles is rolling out to more businesses. It answers routine questions from people who find you on Search and Maps, and hands the rest to you.
>
> Should you switch them on? Our take, from building chat automation for clients:
> ✓ Yes, if your answers are written down: prices, hours, delivery, policies
> ✓ Yes, if someone checks the conversations every day
> × Not yet, if your information changes daily and lives in your head
>
> Check what it costs in your account first, and read every reply in week one.
> #WhatsAppBusiness #GoogleBusinessProfile #AIAgents #Eaglescroft
>
> *(Before posting: confirm both features in your own accounts. Availability varies by country and account.)*

X

> WhatsApp and Google now offer AI that answers your customers. Switch it on if your answers are written down and someone checks the chats daily. Not yet if it all lives in your head.

Wed 18: Ground School: "Before you boost that post"

Graphic: `posts/2026-11/018-w46-wed-ads-checklist/` READY 6 slides: cover → who it's for → one goal → the landing spot is ready → tracking on → test small, then scale → CTA.

LinkedIn / Facebook

Before you press "Boost post", run these 5 checks so your ad money isn't wasted:

1. Who is it for? Location, age and interests, not "everyone".
2. One goal: messages, calls, website visits or sales. Pick one.
3. Is the landing spot ready? A fast page or a WhatsApp that someone answers.
4. Tracking on: Meta Pixel or Google tag installed, so you know what worked.
5. Test small: two versions, a small budget for a few days, then put money behind the winner.

Ads don't fix a broken journey. They make it more expensive. Want us to set up your next campaign properly? Link in the first comment.
