FLIGHT REPORT · CRM + OUTREACH

13,000 raw records. 12,000+ scored leads.

How we turned a list nobody could use into a ranked call sheet, step by step.

13,000
raw records in

12,000+
scored and ranked

1
tailored opening line per lead

100%
approved by a human

01 The problem

A huge list. No one knew who to call first.

PROSPECTS.xlsx — 13,000 rows

COMPANY	SECTOR	EMAIL	PHONE
Company A Ltd	Catering	info@…	—
Company A Ltd	Catering	info@…	—
Company B	?	bounced	+44 …
Company C	Retail	—	+44 …

EVERY MESSAGE STARTED THE SAME

"Dear Sir/Madam, we are a leading company…"

02 Clean

Clean it first. Then trust it.

Remove duplicates

Same company, five rows? Merged into one.

Fix broken fields

Bounced emails, bad numbers and empty sectors flagged and repaired.

Fill the gaps

Missing details enriched, so every lead can be scored fairly.

03 Score

Rank every lead on fit and intent.

The team starts every morning at the top of the list, not at row one.

04 Write

AI drafts the opener. A human approves it.

AI DRAFT · EXAMPLE

"Congrats on opening your second kitchen this year. Most caterers we speak to at that stage are drowning in enquiry emails. Worth a quick chat about automating the first reply?"

Approve Edit

Nothing goes out without a person reading it first. That part stays human.

THE LESSON

Your list is worth more than you think.

It doesn't need more leads. It needs a system: clean, score, write, approve.
