GROUND SCHOOL · WEBSITES

Is your website losing customers?

The 7-point check we run on every site. Fewer than 6 ticks? That's where your leads leak.

01 Checks 1–2

Fast and thumb-friendly.

1 · Speed

Open it on mobile data. Does it load in about 3 seconds? Slow pages lose people before they read a word.

2 · Mobile

Can you read and tap everything without zooming or pinching? Most of your visitors are on a phone.

03 Checks 3–4

Clear in 5 seconds.

3 · Headline

Does a stranger know what you do, and for whom, within 5 seconds of landing?

4 · One action

Is there one obvious next step: call, WhatsApp, book or buy? Too many buttons means no clicks.

05 Checks 5–6

Easy to reach.
Easy to find.

5 · One tap to talk

WhatsApp or click-to-call visible on every page, not hidden in a contact form.

6 · Google Business Profile

Complete, with hours, photos, reviews and your website link. It's often the first page people see.

07 Check 7

Does it feel safe to buy from you?

Padlock (HTTPS)

The browser shows your site as secure.

Real photos

Your team, your work, your premises. Not just stock images.

Reviews you can see

Recent reviews on the site or on Google, with replies.

YOUR SCORE

Fewer than 6 ticks?

That's where your leads are leaking. Save this and run the check today.
