GROUND SCHOOL · AI AUTOMATION

4 reasons businesses haven't automated yet.

And our honest answers.

"I don't know where to start."

"It sounds expensive."

"My customers want a human."

"I don't trust AI with my data."

01 Reason

“I don't know where to start.”

OUR HONEST ANSWER

Start with the question you answer 20 times a day.

- One workflow, not a whole system
- e.g. instant replies to price or delivery questions
- Measure the hours saved in week one

02 Reason

“It sounds expensive.”

OUR HONEST ANSWER

Start small, with tools you already pay for.

- Most email, CRM and WhatsApp tools already include automation
- Prove the time saved first
- Then decide what's worth spending on

03 Reason

“My customers want a human.”

OUR HONEST ANSWER

Good. Automate the waiting, not the relationship.

- Instant first reply, any time of day
- A person takes over the real conversation
- Customers notice speed, not the bot

04 Reason

“I don't trust AI with my data.”

OUR HONEST ANSWER

Fair. Ask before you plug anything in:

- Who can see our data, and where is it stored?
- Is it used to train the model?
- Never paste customer data into public AI tools

YOUR TURN

Which one is yours?

Comment 1, 2, 3 or 4. We'll answer every one.
