GROUND SCHOOL · DIGITAL MARKETING

Before you **boost** that post...

5 checks so your ad money isn't wasted.

01 Audience

Who is it for?

Not "everyone".

- Location: Abuja + 20km
- Age 25–44
- Interests: weddings, events
- Not: the whole country

The tighter the audience, the cheaper every result.

02 Goal

Pick one goal.

Messages

People start a WhatsApp or Messenger chat

Calls

Your phone rings

Website visits

Traffic to one page

Sales

Purchases you can track

03 Landing

Is the landing spot ready?

A WhatsApp someone answers

Quick replies saved, someone on duty, an away message after hours.

Or a page that loads fast

One offer, one button, and it works on a phone on mobile data.

Ads don't fix a broken journey. They make it more expensive.

04 Track · test

Measure it. Then scale the winner.

4 · Tracking on

Meta Pixel or the Google tag installed, so you know what actually worked.

5 · Test small

Two versions, a small budget, a few days. Then put the money behind the winner.

BEFORE YOU PRESS THE BUTTON

Ads amplify what's already there.

Get the 5 checks right and every naira works harder.
