

PERSONAL CONTENT CALENDAR

# Joshua · faceless motion videos · November 2026 plan

JOSHUA OBAJE · FOUNDER & CTO, EAGLESCROFT

Four videos a week for Joshua's personal accounts, 2–29 November 2026 (16 videos). Faceless, voiceover-led motion graphics in the style of the three reference videos. Topics: tech, AI and the everyday-AI themes from the graphics calendar (traders, students, small business, building with AI, African tech). Every script is in `2026-11-scripts.md`.

## 1. What the reference videos do

I transcribed and broke down all three samples. Each one is a repeatable format.

| Sample | Length | Format | Hook pattern | Ending |
|---|---|---|---|---|
| "3 dangerous websites" | 22s | **Drop**: 3 resources, one line each | Audience call-out + forbidden knowledge + open loop: *"Video editors. I'm about to share three dangerous websites your favourite editors don't want you to know. The last one might be the best."* | *"Want the links? Drop **Brilliant** in the comments and check your DMs."* |
| LEGO origin | 40s | **Story**: rise from nothing | Before/after contrast: *"Before LEGO became a billion-dollar empire, it was just a struggling wooden toy business."* | Lesson + soft plug |
| After Effects grid plugin | 95s | **How-to**: tool demo, step by step | Speed + no-pain promise: *"This is how you create this trendy animation in under a minute. And you don't need multiple layers, keyframes or expressions."* | *"Send it to an editor who needs it. Comment **grid** and we'll send you the plugin for free."* |
| Press-conference still | — | **News scene**: realistic AI-rendered scene | Event framing | — |

Shared mechanics:
- **Pace:** about 3 words a second. Speech never pauses for more than half a second.
- **Kinetic type:** one to three words on screen at a time, in sync with the voice.
- **One hero visual per beat:** a browser window, a 3D diorama, a UI panel or a mascot.
- **The keyword is an object:** the comment keyword appears as a styled button, e.g. "Brilliant".
- **The ending asks for one action:** comment a word, send it to someone, or follow.

## 2. What the research says (and how sure we can be)

| Finding | Confidence | What we do with it |
|---|---|---|
| Instagram's head, Adam Mosseri, named **watch time, likes per reach and sends per reach** as the top Reels ranking signals (Jan 2025). Sends matter most for reaching people who don't follow you yet. | High (his own statement, widely reported) | Every script is short and keeps paying off to hold watch time. Each week has at least one **"send this to…"** video (Sun explainers, Wed tutorials). |

| Finding | Confidence | What we do with it |
|---|---|---|
| Most viewers decide in the first **1–3 seconds**. Published hold rates conflict (60% to 90% at 3s), and **faceless openings are harder** because there's no face to hold attention. | Medium (vendor data, conflicting) | The first hook line lands within 3 seconds, with movement and text in frame 1. No logos or slow intros. Judge by your own retention curves, not benchmarks. |
| **Comment-keyword → auto-DM** is well supported on **Instagram/Facebook** (ManyChat and other official Meta partners). On **TikTok**, comment-triggered DMs are unreliable in 2026. | High for Instagram; mixed for TikTok | Instagram/Facebook: automate it. TikTok: same CTA, but reply by hand or pin a comment pointing to the link in bio. Check ManyChat's pricing first: reports say its free plan changed in March 2026. |
| **AI labels:** TikTok, YouTube and Meta all require a label on **realistic** AI-made people, places, events or voices. TikTok reads embedded C2PA data and can label automatically. Unlabelled realistic AI can be restricted. | High | Turn on the AI-content toggle whenever a video uses an AI voice or realistic AI scenes. **No realistic AI depictions of real people** (founders, politicians). Stories use objects, places and stylised figures. |
| No reliable study gives a Lagos/WAT posting time. One Nigeria guide suggests TikTok around **7–8 pm WAT**. Global Reels data is inconsistent. | Low | Start at **7:30 pm WAT**, then move to the peak hours in your own analytics after two weeks. |

## 3. The four weekly formats

| Day | Format | Length | Look | Job in the funnel |
|---|---|---|---|---|
| **Mon** | **Tool Drop**: 3 free tools | 28–33s | **A · Navy Drop** (based on the "dangerous websites" sample) | Comments + saves → DM list |
| **Wed** | **How-To in 60**: one useful workflow | 45–60s | **C · Grid Desk** (based on the plugin sample) | Saves + sends → trust |
| **Fri** | **Origin Story**: a tech company's near-miss | 45–55s | **B · Diorama** (based on the LEGO sample) | Watch time + follows |
| **Sun** | **AI Explained**: one idea in plain English | 40–47s | **D · Newsroom** (based on the press scene, made safe) | Sends + reach to new people |

**Posting:** 7:30 pm WAT. Post natively to Instagram Reels, TikTok, YouTube Shorts and Facebook Reels. Add LinkedIn (native video) for Mon, Wed and Sun. Don't cross-post with another app's watermark.

### Visual looks (one identity across all four)

Use Joshua's personal palette so the videos match his graphics: deep navy `#001E60` → blue `#2563EB` fields, white type, **Sora** headlines with a **Caveat** handwritten accent, and the flight marker as the bullet. Swap the reference video's gold for blue light leaks.

- **A · Navy Drop:** dark navy gradient with a soft blue light leak. Real screen recordings sit in floating browser windows that slide in. Word-by-word kinetic type. The comment keyword is an outlined button at the end.
- **B · Diorama:** stylised 3D miniature scenes (a garage, a Denny's booth, a Nairobi kiosk). Big bold 3D year stamps ("1993"). Objects carry the story: chips, phones, documents.
  **Stylised, not photoreal, and no recognisable real faces.**
- **C · Grid Desk:** green or navy cutting-mat grid. Real UI screenshots in floating frames, step numbers, cursor highlights. Use **an original mascot of your own design**, not a lookalike of a film character (the sample used one; that's a copyright risk).
- **D · Newsroom:** the press-conference energy, made safe: real stock or archive footage, or **stylised** AI scenes with no real people, plus headline lower-thirds and data cards. Never show a real person saying something they didn't say.

### Production specs

1080×1920 at 30 fps. Burn in captions, because many people watch with the sound off. Keep text out of the bottom 20% and the right 15% (the platform buttons sit there). The keyword button holds on screen for at least 1.5 seconds. End card: *"Joshua Obaje · AI made simple"* plus the ask. Use one consistent voice: your own recorded voice (most authentic) or one AI voice for every video (label it). Light background music, ducked under the voice.

## 4. Calendar

| # | Date | Format | Title | CTA |
|---|---|---|---|---|
| V01 | Mon 2 Nov | Tool Drop | 3 free AI tools that feel illegal to know | Comment **TOOLS** |
| V02 | Wed 4 Nov | How-To | Voice note → professional invoice in 60 seconds | Comment **INVOICE** |
| V03 | Fri 6 Nov | Story | Nvidia: 30 days from going out of business | Comment the next company |
| V04 | Sun 8 Nov | Explained | Why ChatGPT confidently makes things up | Send to a friend |
| V05 | Mon 9 Nov | Tool Drop | 3 free research sites every student needs | Comment **STUDY** |
| V06 | Wed 11 Nov | How-To | Make WhatsApp reply while you sleep (free) | Comment **WHATSAPP** |
| V07 | Fri 13 Nov | Story | M-Pesa: the loan app customers turned into a bank | Comment the next startup |
| V08 | Sun 15 Nov | Explained | What an AI agent actually is | Comment **AGENT** |
| V09 | Mon 16 Nov | Tool Drop | 3 free tools that replace paid design software | Comment **DESIGN** |
| V10 | Wed 18 Nov | How-To | Make AI write like you, not like a robot | Comment **VOICE** |
| V11 | Fri 20 Nov | Story | Paystack: fixing Nigeria's checkout problem | Comment the next startup |
| V12 | Sun 22 Nov | Explained | Will AI take your job? The honest numbers | Comment your job title |
| V13 | Mon 23 Nov | Tool Drop | 3 free tools that work like a personal assistant | Comment **ADMIN** |
| V14 | Wed 25 Nov | How-To | One idea → a week of content in 10 minutes | Comment **WEEK** |
| V15 | Fri 27 Nov | Story | ChatGPT turns 4: the "test" that started the AI race | Comment your first prompt |
| V16 | Sun 29 Nov | Explained | The AI scam that copies your family's voice | Send to your family group |

The balance is deliberate: 4 drops, 4 how-tos, 4 stories (2 African, 2 global) and 4 explainers. V15 lands the Friday before ChatGPT's 4th birthday (Mon 30 Nov). V16 ends the month on the most shareable topic.

## 5. DM pack (what the auto-reply sends)

Set each keyword as an Instagram/Facebook comment trigger. Reply text:

- **TOOLS:** "Here you go 👇 NotebookLM: notebooklm.google.com · Gamma: gamma.app · Napkin: napkin.ai. All have free plans with limits. Which one are you trying first?"
- **INVOICE:** "Here's the prompt: *'Turn this into a professional invoice. Business name: [name]. Add an invoice number, today's date, a table with item, quantity, unit price and line total, then the grand total and payment details: [bank details]. Use naira.'* Check the total yourself before sending."
- **STUDY:** "Consensus: consensus.app · Semantic Scholar: semanticscholar.org · Zotero: zotero.org. Always open and read the papers you cite."

- **WHATSAPP:** five messages to copy: greeting, away, price list, delivery, "last price" (written in Joshua's voice, in the scripts file under V06).
- **AGENT:** "Noted 🙌 I'm putting together a step-by-step agent demo. You'll get it here first."
- **DESIGN:** "Photopea: photopea.com · remove.bg · Upscayl: upscayl.org (free desktop app)."
- **VOICE:** "Paste 3 things you wrote, then: *'Study my writing. Describe my tone, sentence length, favourite words and words I never use, as rules another writer could follow.'* Save the result in ChatGPT custom instructions, a Claude Project or a Gemini Gem."
- **ADMIN:** "Tally: tally.so · Perplexity: perplexity.ai · Cal.com: cal.com."
- **WEEK:** the full prompt from V14.

---

## 6. How we'll measure

Each week, log per video: views, **average watch %**, **3-second hold**, sends/shares, saves, keyword comments, and follows from the video. After four weeks, double the best format, test new hooks on the weakest, and plan December.

---

## Sources

- Mosseri's ranking signals: Social Media Today, Social Samosa
- Hook and retention data (vendor, conflicting): Clipspeed, ShortsFast, Kapwing
- Comment-to-DM tools: Buffer, InstantDM on TikTok, DMChamp 2026 review
- AI labelling: The Next Web on YouTube, Billo on TikTok/Meta/C2PA, OpenArt creator guide
- Posting times: TimeToPost Nigeria, SocialPilot Reels
- Fact sources for each story and explainer are listed under each script.

# Joshua · faceless video scripts · November 2026

16 scripts for the plan in `2026-11-video-plan.md`. Pace: about 3 words a second, so 100 words ≈ 33 seconds. **VO** = voiceover, **Screen** = what moves on screen. `[KEYWORD]` = the styled comment button. Lines marked **Check** need a 2-minute re-check on posting day.

---

## Week 1

### V01 · Mon 2 Nov · Tool Drop · "3 free AI tools that feel illegal to know"

**Look A · Navy Drop · ~33s · Keyword: TOOLS**

**0–7s Hook**
- **VO:** "Anyone with a laptop: here are three free AI tools that feel illegal to know. The last one's my favourite."
- *Screen:* words pop in one at a time; three blurred browser windows flicker behind them.

**7–13s · 1**
- **VO:** "First, NotebookLM, by Google. Upload your notes or a PDF, and it turns them into a podcast."
- *Screen:* "first" → **NotebookLM** in a browser window; a PDF drops in and a sound wave plays out.

**13–19s · 2**
- **VO:** "Second, Gamma. Type one sentence, and it builds a full, designed slide deck in about a minute."
- *Screen:* a prompt being typed, then slides cascading out.

**19–26s · 3**
- **VO:** "And finally, Napkin. Paste any paragraph, and it turns it into clean diagrams you can drop into a report."
- *Screen:* a paragraph morphs into a flowchart.

**26–33s · CTA**
- **VO:** "Want the links? Comment TOOLS and check your DMs. Follow for one AI tool every week."
- *Screen:* "Want the links?" → [ TOOLS ] button glows → end card.

**Caption:** 3 free AI tools I use every week 👇 Comment TOOLS for the links. (Free plans have usage limits.) #AItools #productivity #NotebookLM #AIforbusiness #techtips

### V02 · Wed 4 Nov · How-To · "Voice note → professional invoice in 60 seconds"

**Look C · Grid Desk · ~53s · Keyword: INVOICE**

**0–9s Hook**
- **VO:** "This is how you turn a voice note into a professional invoice in under a minute. No templates. No typing. Let me show you."
- *Screen:* a phone shows a voice-note waveform, which morphs into a clean invoice. Text: "Voice note → Invoice".

**9–14s · Step 1**
- **VO:** "Open ChatGPT, Gemini or Claude on your phone, and tap the microphone."
- *Screen:* phone mockup with three app tiles; the mic button pulses.

**14–23s · Step 2**
- **VO:** "Now talk like you're telling a friend. 'Invoice for Ade Stores. Ten bags of rice at seventy-two thousand naira each. Delivery, five thousand. Due Friday.'"
- *Screen:* speech-to-text appears line by line in a chat bubble.

**23–32s · Step 3**
- **VO:** "Then add one line: 'Turn this into a professional invoice with my business name, an invoice number, today's date, a table and the total.'"
- *Screen:* the prompt is highlighted; the AI's table renders.

**32–37s · Step 4 (honesty beat)**
- **VO:** "Check every number. AI can add wrongly, so confirm the total yourself."
- *Screen:* a magnifying glass over the total; handwritten tick "checked ✓".

**37–44s · Step 5**
- **VO:** "Copy it into Google Docs, add your logo, download it as a PDF, and send it on WhatsApp."
- *Screen:* Docs → PDF icon → WhatsApp chat with the PDF bubble "sent ✓✓".

**44–53s · CTA**
- **VO:** "Comment INVOICE and I'll send you the exact prompt. And send this to someone who still writes invoices by hand."
- *Screen:* [ INVOICE ] button → end card.

**Caption:** Stop typing invoices. Talk to your phone instead 🎙️ Comment INVOICE for the prompt. #smallbusiness #AItips #NaijaBusiness #ChatGPT #entrepreneur

## V03 · Fri 6 Nov · Origin Story · "Nvidia: 30 days from going out of business"

**Look B · Diorama · ~51s · CTA: comment the next company**

**0–6s Hook**
- **VO:** "Before Nvidia became a five-trillion-dollar company, it was thirty days from going out of business."
- *Screen:* a giant 3D "$5 TRILLION" tower cracks and rewinds to a tiny office. Stamp: "1997 · 30 DAYS LEFT".

**6–15s**
- **VO:** "In 1993, three engineers met at a Denny's restaurant in California and decided to build chips for 3D graphics. Jensen Huang became the CEO."
- *Screen:* diorama of a diner booth with coffee cups and napkin sketches of a chip. Stylised figures, no real faces.

**15–22s**
- **VO:** "Their first chip flopped. By 1997, Nvidia was down to about forty people and roughly one month of cash."
- *Screen:* a chip box labelled "NV1" falls into a bin; a calendar flips to "30".

**22–30s**
- **VO:** "So they bet everything on one more chip, the RIVA 128. It sold about a million units in four months. The company survived."
- *Screen:* a graphics card spins; a counter rolls up to "1,000,000".

**30–40s · The twist**
- **VO:** "Then came the twist. Graphics chips do thousands of small calculations at once. That's exactly what AI needs. Today, most of the world's AI runs on Nvidia chips."
- *Screen:* game pixels dissolve into neural-network dots; "GAMES → AI".

**40–51s · Lesson + CTA**
- **VO:** "Sometimes the thing you build for one market wins a much bigger one. Which tech company should I cover next? Tell me in the comments."
- *Screen:* "Built for games. Won AI." → end card + follow.

**Caption:** From a diner booth to a $5 trillion company 🤯 Which company should I cover next? #Nvidia #AI #techhistory #startup #JensenHuang
**Check:** Nvidia's market value on posting day. It was above $5 trillion in late October 2026 (sources disagree slightly).
**Sources:** Electronic Design: RIVA 128 (~40 staff, about a month of payroll; ~1M units in 4 months) · Tom's Hardware: NV1 to Turing · CompaniesMarketCap

## V04 · Sun 8 Nov · AI Explained · "Why ChatGPT confidently makes things up"

**Look D · Newsroom · ~43s · CTA: send it**

**0–4s Hook**
- **VO:** "ChatGPT just lied to you, and it didn't even know it."

- *Screen:* a chat bubble with a confident answer; a red "FALSE" stamp slams on it.

**4–14s**
- **VO:** "AI chatbots don't look facts up like Google does. They predict the next most likely word, one word at a time, from patterns in billions of pages."
- *Screen:* words appear one by one with probability bars flickering above each.

**14–23s**
- **VO:** "Most of the time, the most likely answer is the right one. But when it doesn't know, the most likely-sounding answer can be completely made up."
- *Screen:* a lower-third reads "HALLUCINATION". Examples flash: a fake statistic, a book that doesn't exist.

**23–35s · The rule**
- **VO:** "So here's the rule. Use AI to draft, explain and brainstorm. But anything with a number, a name, a date or a quote, check it yourself, or ask for sources and open them."
- *Screen:* a checklist ticks off: Number · Name · Date · Quote.

**35–43s · CTA**
- **VO:** "Send this to someone who believes everything ChatGPT says. And follow for AI, explained in plain English."
- *Screen:* a send-arrow animation → end card.

**Caption:** AI doesn't "know" things. It predicts them. Here's how to not get fooled 👇 #ChatGPT #AIexplained #AIliteracy #tech #learnAI

---

## Week 2

### V05 · Mon 9 Nov · Tool Drop · "3 free research sites every student needs"

**Look A · Navy Drop · ~29s · Keyword: STUDY**

**0–5s Hook**
- **VO:** "Students. Three free research websites your lecturers wish you knew. The second one saves hours."
- *Screen:* "Students." pops in; graduation-cap icon; three browser windows.

**5–11s · 1**
- **VO:** "First, Consensus. Ask a question in plain English, and it answers from real published papers, with the sources."
- *Screen:* a question is typed; answer cards appear with "📄 source" tags.

**11–16s · 2**
- **VO:** "Second, Semantic Scholar. Millions of papers, free, with a one-line summary of each."
- *Screen:* search results, each with a highlighted one-line summary.

**16–23s · 3**
- **VO:** "And Zotero. Save any source in one click, and it formats your references in APA or Harvard for you."
- *Screen:* a "Save" click → a reference list builds itself.

**23–29s · CTA**
- **VO:** "Comment STUDY for all three links. And always read the papers you cite."
- *Screen:* [ STUDY ] → end card.

**Caption:** Research smarter, not harder 📚 Comment STUDY for the links. #students #research #university #AIforstudents #studytips

### V06 · Wed 11 Nov · How-To · "Make WhatsApp reply while you sleep (free)"

**Look C · Grid Desk · ~46s · Keyword: WHATSAPP**

**0–8s Hook**
- **VO:** "Your customers message at midnight, and you reply at nine a.m. Here's how to make WhatsApp answer for you,

free, in five minutes."
- *Screen:* a phone clock shows 12:04 AM; the chat fills with unanswered messages; text "Free · 5 minutes".

**8–11s · Step 1**
- **VO:** "Download WhatsApp Business. Same WhatsApp, made for selling."
- *Screen:* app icon; phone mockup.

**11–17s · Step 2**
- **VO:** "Go to Settings, then Business tools. Turn on the Greeting message. It welcomes every new customer automatically."
- *Screen:* the tap path is highlighted; a greeting bubble pops in.

**17–26s · Step 3**
- **VO:** "Turn on the Away message, and set it to outside business hours. 'Thanks for your message! We'll reply by nine a.m. Meanwhile, see our catalogue.'"
- *Screen:* schedule toggle; a 2 AM message gets an instant away reply.

**26–31s · Step 4**
- **VO:** "Add your Catalogue: photos, prices, descriptions. Customers can browse without asking 'how much?'"
- *Screen:* product grid with prices.

**31–37s · Step 5**
- **VO:** "Then Quick replies. Save your top answers, type slash price, and the whole price list appears."
- *Screen:* typing "/price" expands into a full message.

**37–46s · CTA**
- **VO:** "Comment WHATSAPP and I'll send you five ready-made messages to copy. Send this to a business owner who needs it."
- *Screen:* [ WHATSAPP ] → end card.

**Caption:** Your business can reply at 2am, without you 😴 Comment WHATSAPP for 5 copy-paste messages. #WhatsAppBusiness #smallbusiness #NaijaBusiness #customerservice #sellonline

**The five messages (the WHATSAPP DM)**
1. *Greeting:* "Hi, welcome to [Business]! 👋 Tell us what you're looking for and we'll help you right away. See our catalogue for prices."
2. *Away:* "Thanks for your message! We're closed now and will reply by 9am. Meanwhile, browse our catalogue 👉 [catalogue link]."
3. */price:* "Here are today's prices: [item – price]. Delivery: [areas & fee]. Want me to reserve one for you?"
4. */delivery:* "We deliver to [areas] in [time]. Pay on delivery or by transfer. Send your address to get started."
5. */lastprice:* "Our prices are already our best, so you get quality you can trust. Buying [quantity] or more? I can do [offer]."

**Note:** these features are free in the WhatsApp Business app. Replies that understand any question need the paid WhatsApp Business API. Don't claim this setup is "AI".
**Source:** Gurusup: WhatsApp Business automatic messages

## V07 · Fri 13 Nov · Origin Story · "M-Pesa: the loan app customers turned into a bank"

**Look B · Diorama · ~46s · CTA: comment the next startup**

**0–7s Hook**
- **VO:** "Africa's most famous mobile money service started as a way to repay small loans. Then customers did something nobody planned."
- *Screen:* a basic phone in a Nairobi street diorama; coins fly out of it.

**7–15s**
- **VO:** "Kenya, 2005. Vodafone and Safaricom, with funding from the UK government, tested a simple idea: let people repay microloans by text."
- *Screen:* stamp "2005 · PILOT"; a loan document becomes an SMS.

**15–23s**
- **VO:** "But during the pilot, people started using it for something else. Sending money to family. Paying each other. Topping up airtime."
- *Screen:* money arrows fly between tiny houses, shops and buses.

**23–31s**
- **VO:** "Instead of forcing the original plan, the team followed the customers. In March 2007, M-Pesa launched with one main promise: send money."
- *Screen:* a big 3D "SEND MONEY" button pressed; stamp "MARCH 2007".

**31–38s**
- **VO:** "M for mobile. Pesa, Swahili for money. No bank account needed, just a phone and an agent around the corner."
- *Screen:* the name assembles letter by letter; a kiosk agent stand lights up.

**38–46s · Lesson + CTA**
- **VO:** "Watch what your customers actually do, not what you planned. Which African startup should I cover next? Comment below."
- *Screen:* "Follow your customers." → end card.

**Caption:** The loan app that became a money revolution 🇰🇪 Which African startup is next? #MPesa #fintech #AfricanTech #startup #Kenya
**Sources:** Wikipedia: M-Pesa (DFID-funded pilot from 2005, microfinance repayments, launch March 2007) · Hughes & Lonie 2007 paper · World Bank/IFC case study

## V08 · Sun 15 Nov · AI Explained · "What an AI agent actually is"

**Look D · Newsroom · ~45s · Keyword: AGENT**

**0–5s Hook**
- **VO:** "Everyone's saying 'AI agents'. Here's what it actually means, in thirty seconds."
- *Screen:* a headline ticker with "AI AGENTS" repeated; a timer starts at 0:30.

**5–18s**
- **VO:** "A chatbot answers. An agent acts. Ask a chatbot for flight prices, and it tells you. Ask an agent, and it opens the website, compares the options, fills in the form, and asks: shall I book?"
- *Screen:* split screen, "CHATBOT: talks" vs "AGENT: does". The agent side shows a cursor moving through a website by itself.

**18–26s**
- **VO:** "Agents use tools: a browser, your email, your calendar, a spreadsheet. They break a big task into steps and work through them."
- *Screen:* tool icons snap into a checklist of steps.

**26–36s · The rule**
- **VO:** "They're powerful, and they make mistakes. So the golden rule: let the agent prepare, and you approve. Never hand over money or passwords without a human check."
- *Screen:* a big "APPROVE?" button with a human hand hovering.

**36–45s · CTA**
- **VO:** "Want to see one working, step by step? Comment AGENT, and if enough of you do, that's my next video."
- *Screen:* [ AGENT ] → end card.

**Caption:** Chatbots talk. Agents do. 🤖 Comment AGENT if you want a live demo. #AIagents #AIexplained #automation #futureofwork #tech

## Week 3

### V09 · Mon 16 Nov · Tool Drop · "3 free tools that replace paid design software"

**Look A · Navy Drop · ~31s · Keyword: DESIGN**

**0–8s Hook**
- **VO:** "Small business owners. Stop paying for design software. These three free tools do the job. The last one runs on your own laptop."
- *Screen:* a "$" price tag gets crossed out; three windows.

**8–14s · 1**
- **VO:** "First, Photopea. A free photo editor in your browser. It even opens Photoshop files. No download."
- *Screen:* a PSD opens in the browser; layers panel.

**14–19s · 2**
- **VO:** "Second, remove dot b g. It removes the background from any product photo in seconds."
- *Screen:* a product photo; the background vanishes into a transparent checkerboard.

**19–26s · 3**
- **VO:** "And Upscayl. It turns a blurry, low-quality image into a sharp one. Free, open source, right on your computer."
- *Screen:* blur → sharp wipe with a before/after slider.

**26–31s · CTA**
- **VO:** "Comment DESIGN for the links. Follow for more free tools."
- *Screen:* [ DESIGN ] → end card.

**Caption:** Free design tools that do what paid ones do 🎨 Comment DESIGN. (remove.bg is free at preview size.) #designtools #smallbusiness #freetools #AItools #canvaalternative

### V10 · Wed 18 Nov · How-To · "Make AI write like you, not like a robot"

**Look C · Grid Desk · ~47s · Keyword: VOICE**

**0–8s Hook**
- **VO:** "If your AI writing sounds like a robot, it's because you never showed it how you write. Fix it in one minute."
- *Screen:* a robotic paragraph glitches, then morphs into a warm, human one.

**8–14s · Step 1**
- **VO:** "Step one. Copy three things you've written: a post, an email, and a message to a customer."
- *Screen:* three cards fly into a chat box.

**14–23s · Step 2**
- **VO:** "Step two. Paste them into ChatGPT, Claude or Gemini with this: 'Study my writing. Describe my tone, sentence length, favourite words, and words I never use.'"
- *Screen:* the prompt types out; the AI returns a "Your style guide" card.

**23–33s · Step 3**
- **VO:** "Step three. Save that description. In ChatGPT it's Custom instructions. In Claude, a Project. In Gemini, a Gem. Now every caption and email starts in your voice."
- *Screen:* three settings screens, each with a highlight ring.

**33–39s · Step 4**
- **VO:** "Step four. Still write the first line yourself. That's where people decide to keep reading."
- *Screen:* the first line underlined in handwriting: "yours YOUR WORDS ".

**39–47s · CTA**
- **VO:** "Comment VOICE and I'll send you the exact prompt. Follow for AI that actually saves you time."
- *Screen:* [ VOICE ] → end card.

**Caption:** Make AI sound like YOU 🗣️ Comment VOICE for the prompt. #ChatGPT #Claude #contentcreation #AIwriting #personalbranding

### V11 · Fri 20 Nov · Origin Story · "Paystack: fixing Nigeria's checkout problem"

**Look B · Diorama · ~47s · CTA: comment the next startup**

**0–8s Hook**
- **VO:** "In 2015, a Nigerian developer was tired of one problem. Five years later, Stripe bought his company for over two hundred million dollars."
- *Screen:* a Lagos rooftop diorama at night with a laptop glow; a "$200M+" stamp drops in.

**8–16s**
- **VO:** "Getting paid online in Nigeria was painful. Payments failed, checkout forms were long, and many tools weren't built for Nigerian cards."
- *Screen:* a checkout page with a red "Payment failed" error, repeated.

**16–22s**
- **VO:** "Shola Akinlade co-founded Paystack in Lagos with one idea: make online payments in Nigeria just work."
- *Screen:* a "Pay" button turns green with a tick. Name as text only; no portrait.

**22–29s**
- **VO:** "In 2016, it became the first Nigerian company accepted into Y Combinator, Silicon Valley's most famous startup programme."
- *Screen:* stamp "2016 · Y COMBINATOR"; a plane flies Lagos → San Francisco.

**29–39s**
- **VO:** "Businesses signed up fast, because developers could plug it in easily. Stripe invested in 2018, and in October 2020, it bought Paystack, reported at over two hundred million dollars."
- *Screen:* a growth line; stamps "2018" then "OCT 2020 · ACQUIRED".

**39–47s · Lesson + CTA**
- **VO:** "Solve a boring problem everyone has, and solve it properly. Which Nigerian startup should be next? Tell me below."
- *Screen:* "Boring problem. Built properly." → end card.

**Caption:** The Lagos startup that fixed online payments 🇳🇬 Who's next? #Paystack #fintech #NigeriaTech #startup #YCombinator
**Editorial note:** the script names only Shola Akinlade. Co-founder Ezra Olubi was dismissed by Paystack in November 2025 after misconduct allegations, so leave him out of the story.

### V12 · Sun 22 Nov · AI Explained · "Will AI take your job? The honest numbers"

**Look D · Newsroom · ~41s · CTA: comment your job title**

**0–5s Hook**
- **VO:** "Will AI take your job? Here's the honest answer, with real numbers."
- *Screen:* lower-third "BREAKING: THE AI JOBS QUESTION".

**5–16s**
- **VO:** "The World Economic Forum surveyed over a thousand of the world's biggest employers. Their forecast for 2030: about ninety-two million jobs lost, but about a hundred and seventy million created."
- *Screen:* data card "-92M / +170M", with bars animating.

**16–21s**
- **VO:** "That's a net gain of seventy-eight million. The catch? They're not the same jobs."
- *Screen:* "+78M NET", then a "BUT…" card.

**21–29s**
- **VO:** "The jobs shrinking fastest are repetitive: data entry, cashiers, basic admin. The growing ones need people who can use technology and think clearly."
- *Screen:* two columns, "SHRINKING" vs "GROWING", with icons.

**29–34s**
- **VO:** "So AI probably won't take your job. But someone who uses AI well might."
- *Screen:* the line lands in big type.

**34–41s · CTA**
- **VO:** "Comment your job title, and I'll tell you one AI skill to learn first."
- *Screen:* a comment box animating "Accountant… Teacher… Trader…" → end card.

**Caption:** 92M jobs lost, 170M created by 2030. Here's what that means for you 👇 Comment your job title. #futureofwork #AIjobs #careers #WEF #upskilling
**Sources:** WEF Future of Jobs Report 2025 coverage (170M created, 92M displaced, net 78M by 2030, from employer surveys) · Business Today
**Note:** these are employer forecasts, not counts. The VO says "forecast" on purpose.

## Week 4

### V13 · Mon 23 Nov · Tool Drop · "3 free tools that work like a personal assistant"

**Look A · Navy Drop · ~28s · Keyword: ADMIN**

**0–7s Hook**
- **VO:** "Running a business alone? These three free tools work like a personal assistant. Number three ends the back-and-forth on WhatsApp."
- *Screen:* a to-do list ticks itself off; three windows.

**7–12s · 1**
- **VO:** "First, Tally. Build order forms, booking forms and surveys in minutes. Unlimited forms, free."
- *Screen:* a form builds itself block by block.

**12–17s · 2**
- **VO:** "Second, Perplexity. Ask any business question and get an answer with the sources linked."
- *Screen:* question → answer with numbered source chips.

**17–24s · 3**
- **VO:** "And Cal.com. Share one link, and clients book a time that works for both of you. No more 'what time is good?'"
- *Screen:* a WhatsApp thread of "what time?" messages gets replaced by one booking link → calendar slot fills.

**24–28s · CTA**
- **VO:** "Comment ADMIN for the links. Follow for more."
- *Screen:* [ ADMIN ] → end card.

**Caption:** Your free personal assistant stack 🗂️ Comment ADMIN. #solopreneur #smallbusiness #productivity #AItools #NaijaBusiness

### V14 · Wed 25 Nov · How-To · "One idea → a week of content in 10 minutes"

**Look C · Grid Desk · ~49s · Keyword: WEEK**

**0–8s Hook**
- **VO:** "Posting every day doesn't mean writing every day. Here's how I turn one idea into a week of content in ten minutes."
- *Screen:* one lightbulb splits into seven post cards labelled Mon–Sun.

**8–13s · Step 1**
- **VO:** "Step one. Write your idea in one messy paragraph, or just voice-note it."
- *Screen:* a scribbled note, then a mic.

**13–24s · Step 2**
- **VO:** "Step two. Ask AI: 'Turn this into seven posts: a story, a how-to, a myth versus truth, a checklist, a question for my audience, a quote, and a behind-the-scenes. Keep my voice.'"
- *Screen:* the prompt with each format chip lighting up in turn.

**24–30s · Step 3**
- **VO:** "Step three. Ask for three hooks for each post, and pick the best one yourself."
- *Screen:* three hook cards; one gets circled by hand.

**30–35s · Step 4**
- **VO:** "Step four. Turn the how-to into a carousel in Canva or Gamma."
- *Screen:* text → slides.

**35–43s · Step 5**
- **VO:** "Step five. Schedule everything on Sunday night. Done for the week. Just edit each one; AI drafts, you bring it to life."
- *Screen:* a calendar fills with seven posts; "Done ✓".

**43–49s · CTA**
- **VO:** "Comment WEEK and I'll send you the full prompt. Follow for more."
- *Screen:* [ WEEK ] → end card.

**Caption:** 1 idea = 7 posts 💡 Comment WEEK for the prompt. #contentcreation #socialmediatips #AItools #personalbranding #ChatGPT

**WEEK DM (full prompt):** "Here's my idea: [paste]. My audience: [who]. Turn it into 7 posts for this week: 1) a short story, 2) a how-to with steps, 3) myth vs truth, 4) a checklist, 5) a question for my audience, 6) a quotable line, 7) a behind-the-scenes. Write in my voice: [paste your style description]. For each post, give 3 hook options and a call to action."

## V15 · Fri 27 Nov · Origin Story · "ChatGPT turns 4: the 'test' that started the AI race"

**Look B · Diorama · ~47s · CTA: comment your first prompt**

**0–7s Hook**
- **VO:** "On Monday, ChatGPT turns four. But when it launched, even the people who built it didn't expect what happened next."
- *Screen:* a 3D birthday candle "4" on a chat-bubble cake; it rewinds to a quiet launch page.

**7–15s**
- **VO:** "November thirtieth, 2022. OpenAI released ChatGPT as a free research preview. Basically a test, to see how people would use it."
- *Screen:* stamp "30 NOV 2022 · RESEARCH PREVIEW"; a small server room diorama.

**15–25s**
- **VO:** "Five days later, it had a million users. Within about two months, an estimated hundred million people were using it every month, faster than TikTok or Instagram ever grew."
- *Screen:* a counter explodes 1M → 100M; race-track bars: TikTok (9 months), Instagram (2.5 years), ChatGPT (2 months).

**25–32s**
- **VO:** "Students used it for homework. Developers for code. Businesses for emails. Within months, every major tech company changed its plans."
- *Screen:* tiny figures in a school, an office and a shop, all typing; tech-company buildings light up one after another (stylised, no logos needed).

**32–38s**
- **VO:** "A product launched as a test started the AI race we're all living in now."

- *Screen:* "A TEST → A RACE".

**38–47s · CTA**
- **VO:** "So tell me: what was the first thing you ever asked ChatGPT? Comment below. And follow for more tech stories."
- *Screen:* a comment box types "My first prompt was…" → end card.

**Caption:** 4 years ago today-ish, a "test" changed everything 🎂 What was YOUR first ChatGPT prompt? #ChatGPT #OpenAI #AI #techhistory #AInews
**Sources:** Fortune, Feb 2023 (1M in 5 days; UBS estimate of 100M monthly users in ~2 months) · TechSpot on UBS (TikTok 9 months, Instagram 2.5 years) · OpenAI's launch post, 30 Nov 2022 ("research preview").
**Note:** the 100M figure is an analyst estimate of monthly users. The VO says "an estimated".

## V16 · Sun 29 Nov · AI Explained · "The AI scam that copies your family's voice"

**Look D · Newsroom · ~47s · CTA: send to the family group**

**0–7s Hook**
- **VO:** "If your 'brother' calls crying and asks you to send money now, stop. It might not be him."
- *Screen:* an incoming call "Brother 📞"; the waveform glitches; "STOP" stamp.

**7–17s**
- **VO:** "Scammers can now copy a voice from a short clip, like a video your family posted online. They call, sound exactly like someone you love, and create panic."
- *Screen:* a social video → audio extracted → cloned waveform; stylised silhouettes only.

**17–21s**
- **VO:** "An accident. An arrest. A 'lost phone'. Panic is the weapon."
- *Screen:* three lower-third headlines flash.

**21–38s · Protect your family**
- **VO:** "So protect your family today. One: agree on a family code word, something never posted online. If the caller can't say it, hang up. Two: hang up and call them back on the number you already have. Three: never send money on a call that rushes you."
- *Screen:* three numbered cards: 🔑 Code word · 📞 Call back · ⏸️ Don't rush.

**38–47s · CTA**
- **VO:** "Real emergencies can wait two minutes. Send this to your family group chat right now. It could save someone's money."
- *Screen:* a family WhatsApp group with the video being forwarded → end card.

**Caption:** Share this with your family today 🙏 AI can clone voices. A code word can stop it. #scamalert #AIscam #deepfake #cybersecurity #staysafe
**Sources:** FTC warning via Fox 2 Detroit (a short audio clip plus a cloning program) · Guard.io (code word and call-back advice)
**Note:** estimates of how much audio is needed range from about 3 to 30 seconds, so the VO says "a short clip" rather than a number.
